**Resume
Banking**

Introducing the Career Network Resume Bank

The Career Network is launching a resume bank for students exploring neuroX fields. Resumes in the resume bank will be shared with those who may have professional and educational opportunities of interest.

Students looking to apply for positions in neuroX industries and apply to neuroX fellowships and programs can send in their resume to the Career Network. Resumes in the resume bank will be shared with those who may have professional and educational opportunities of interest. Information will only be shared with trusted members of our network, and you can remove your resume materials at any time.

Interested students should send their resume and a brief 3-5 sentence personal introduction to info@neuroxcareers.org.

NEXT WEEK: Regional Neuroscience & Society Meetups

Neuroscience and society (neuroX) fields are rapidly emerging. Given the novelty of these fields, navigating career paths and training opportunities in neuroscience and society can be challenging. The Career Network informal meetups will offer an introduction to neuroX fields, with an emphasis on how you might forge a career in them.

Meetups are structured as small group discussions with Dr. Francis Shen. The first 30 minutes of each program feature a presentation, followed by Q&A and discussion. While we denote a regional designation for each event, all are welcome regardless of where you live or go to school.

NEXT WEEK:

SOUTHEAST REGIONAL
NEUROSCIENCE & SOCIETY
VIRTUAL MEETUP

**Interested in learning more about careers at
the nexus of neuroscience & society?**

Join us for the
Career Network in Neuroscience & Society
Southeast Regional Meetup!

Neuroscience and society (neuroX) fields—such as neuroethics, neurolaw, neuroeconomics, neuromarketing, educational neuroscience (and more!)—are rapidly emerging. Given the novelty of these fields, navigating career paths and training opportunities in neuroscience and society can be challenging. With support from the Dana Foundation, this event will offer an introduction to these fields, with an emphasis on how you might forge a career in them.

The event will introduce resources from the Dana Foundation Career Network in Neuroscience and Society. This session will be run as a small group conversation for students, recent grads, post-docs, and those seeking midcareer transitions. Led by Harvard professor Francis Shen, the discussion will explore questions such as: What is “neuroscience and society” and how can you make a career out of it? What type of education do you need for these interdisciplinary careers? What are some of the barriers you are encountering as you explore these career options?

REGISTER HERE:

WHEN:

Monday, Nov. 6th

Main event:

7-8 pm Eastern

Small group discussion:

8-8:30 pm Eastern

**COVERING 23 +
RAPIDLY EMERGING
NEUROSCIENCE & SOCIETY
DISCIPLINES!**

Southeast Regional Meetup

Monday, November 6th, 7pm Eastern

Register

East Coast Regional Meetup

November 15, 7:00 pm Eastern

Register

More details: These meetups will be run as a small group conversation for students, recent grads, post-docs, and those seeking midcareer transitions. Led by Harvard professor Francis Shen, the discussion will explore questions such as: What is “neuroscience and society” and how can you make a career out of it? What type of career can you imagine yourself pursuing at the intersection of neuroscience and society? What type of education do you need for these interdisciplinary careers? What are some of the barriers you are encountering as you explore these career options? What don’t you know that you want to know about careers in neuroscience and society?

Interested in Neurohumanities?

A new cross-institutional NeuroHumanities working group is looking for potentially interested members. If you are interested, please fill out [this](#) form.

Additional Events

March 20-21, 2024: Neuromarketing World Forum is being hosted in Los Angeles, California. [Learn more.](#)

Educational Opportunities

Deadline **11** ■ **JAN**
2024

Multilateral Diplomacy

United Nations Institute for Training and Research

Executive Diploma on Law and Neuroscience: A Comparative Approach

This course critically reflects on the present and future relevance of applications of neuroscience in the field of law, in particular criminal law. By using a comparative approach, considering both US and European jurisdictions, participants will understand how neuroscientific research may inform criminal justice doctrine, practice, and policy.

Featured Opportunities

The [Jobs and Opportunities page on the Career Network website](#) provides links to jobs, fellowships, and other opportunities. In addition to those listings, below are highlighted opportunities for career growth.

Additional Opportunities

NeuroX Jobs Requiring Undergraduate Degree

- The Association for Frontotemporal Degeneration has [several employment opportunities](#): Senior Director of Advancement, Support Services Manager, and Communications Manager.

NeuroX Jobs Requiring Graduate Degree

- NIH BRAIN Initiative is currently seeking applications for the position of Program Director for Neuroethics. [Learn more.](#)
- The New York Academy of Sciences is hiring for [several opportunities](#): Program Manager of Awards, Senior Scientific Editor, and Web Content Manager.
- The Department of Psychology and Neuroscience of Boston College is conducting an open area tenure-track search for an assistant professor to begin July 1, 2024. The position is a joint appointment in Psychology and Neuroscience and African and African Diaspora Studies. [Learn more.](#)

- Teachers College at Columbia University is hiring for an Adjunct instructor in Neuroscience and Education. [Learn more.](#)

Call for Papers

- Manuscript submission is now open for a new Open Access article collection, co-edited by Dr. Anita C. Randolph, Dr. April Joy Damian, and Dr. Kaston Anderson on “**Justice, Diversity, Equity, and Inclusion (J-DEI) in Substance Use & Mental Health Research and Practice**” in collaboration with **Frontiers in Public Health** (Impact Factor of 5.2 and CiteScore of 3.8). This Research Topic aims to advance the science and practice of public health regarding the integration of J-DEI in local, national, and international contexts. The deadline is **December 15th**. [Learn more.](#)

Career Network Website

Information on the Career Network can be found at neuroXcareers.org.

The Career Network website provides background on neuroscience and society fields, presents recordings of Career Network events, showcases original interviews with neuroscience and society experts, and offers resources for pursuing education and careers at the intersection of neuroscience and society.
